MackKay Decorative Pole

Are you looking for a way to continue your downtown revitalization or restoration without sacrificing your parking control?

The decorative pole assembly has an antique look and fits over your existing galvanized steel pole, allowing the meter to blend in with the landscape.

Easy to install and maintain, the extruded pipe is constructed of aluminum, while the remainder of the assembly is constructed of Industry proven zamac and powder coated for maximum resistance to corrosion. The fluted pole, when painted with our Electrostatic dry powder paint, deters graffiti as well as sticker adhesive to the pole surface, further enhancing the long term beauty of your project.

The decorative pole also provides enhanced security to your meters by providing a protective sleeve over the mounting pole.
