

MackKay Meters Selected to Provide Multi-Space Pay Stations and Single-Space Parking Meters by MAPC

New Glasgow, NS - Thursday, January 22, 2015

MackKay Meters, Inc. (www.mackaymeters.com) has been selected as one of the vendors to provide both multi-space pay stations and single-space parking meters to the Metropolitan Area Planning Council (MAPC) through its collective procurement process. This will allow municipalities in the State of Massachusetts to purchase directly from the approved vendors list and reduce the time and cost of the RFP process.

The MackKay Guardian™ series of products, including the Multi Elite pay station, the SOLO and DUO wireless single/double space credit card accepting meters, and the Guardian™ X Series single space meters, have proven to be among the most reliable and durable meters on the street, in all environmental conditions.

Supporting these meters is MackKay's powerful back end solution, Sentinel™ Meter Management System. Sentinel™ MMS was designed specifically to integrate with third party solutions, allowing the customer the flexibility to choose the vendors they want to deal with for ticketing, accounting, mobile payment, and sensor technology.

“We were extremely pleased to be included in the MAPC’s vendor list” says James MacKay, Vice President of Sales at MackKay Meters. “Our commitment to customer service, coupled with products built for superior performance in the sometimes harsh Massachusetts climate, has been key to maintaining a strong presence in the Commonwealth. MackKay has had an excellent track record throughout the New England area for over 50 years and we are looking forward to a successful partnership with the MAPC members.”

About MacKay Meters

For more than fifty years, and with over 500,000 meters sold, MacKay Meters has provided customers worldwide with innovative parking systems including quality single and multi-space parking meters. MacKay was the first single-space parking meter Company in the world to be ISO 9001:2000 certified and has had this prestigious quality assurance recognition since 1995. MacKay's solar powered, cellular-enabled MacKay Guardian™ SOLO was the first single-space meter to receive FCC Certification (Sept. 21, 2011), PTCRB Certification (Sept. 22, 2011), and the first to obtain EMV™ Level 1 Contactless Certification (Dec. 27, 2012).
