General Description

MacKay GO works on Android version 5.01 or higher.
Features include:

- Check meter for current software
- Transfer audit data to Sentinel™ Meter Management System (Sentinel MMS)
- Program meter with new rate file
- Manage the location of the meter in Sentinel MMS
- Reset clock times and time zones on meters

Update Rate / Tariff Management

Allows maintenance staff to deploy prebuilt rate/tariff files to:

- traditional X-Series meters
- wireless single or dual space meters
- multi space pay stations.

Rates can be sent to built and modified using Sentinel MMS.

Location Management

In Meter Management, users can view each individual meter and see the meter Info, and location for each. From this menu, a meter can be assigned to a location.

Features include:

- Add / Assign Meters (single space and multi space)
- Add locations directly into Sentinel MMS with real GPS coordinates
- Setup dual-bay locations for dual-bay meters with a left and right space

MAP Display

With the MAP display feature, the user can search for a specific meter or a group of meters using the digital map interface. Each meter is represented by an icon that can be selected to show detailed meter information.

Features include:

- Digital MAP Display with building footprints
- View Locations nearest to the handheld
- Add locations directly into Sentinel MMS using the GPS functionality built into the handheld device

Audit Meter

In Perform Audit, collection officers can automatically push audit files directly to Sentinel MMS in real-time.

Simply:

- Insert the probe into the coin slot
- Press "audit meter" on the handheld
- Collect the coins from the meter

Handheld Specifications

- Ruggedised Android phone with locked upgrade and data controls to ensure the device will continue to work with all versions of the app.
- Data plan included in annual operations pricing.
